Specific notes:

- Media player 3 (2E) option has to be coded before or after the GW17/33V21 installation
- Media Player 3 (2E) and Telephone (77) options have to be coded before or after the GWP1V21 installation. In case of Bolero and Columbus Head Units the phone coding is not necessary because phone information also visible on the car Radio. In order to see phone info on the cluster (FIS) 77 has to be coded
- Steering wheel controls and Maxi DOT (also known as MFA High Line) cluster is required for Gateway Pro installation, because otherwise the phone functions cannot be reached

Other important notes

¹ From 2011 the GW300 is not compatible with Swing (RCD310), Amundsen (RNS310), Bolero & Columbus (RCD/RNS 510)
